

PROJECT: GEORGIA INSTITUTE OF TECHNOLOGY CHALLENGE COURSE

SITE PLAN

DESCRIPTION

PROJECT DESCRIPTION

Georgia Development Partners was selected in November 2008 by the Board of Regents of The University System of Georgia to construct a challenge course for the Center for Recreational Development at Georgia Tech. The elevated challenge course provides courage building opportunities through the exercise of navigating the following elements: a series of three 40' towers, a 60' vertical drop, 130' zip line, and various climbing obstacles. This predominantly steel structure is one of the most technically advanced and challenging facilities in the United States. The project also included indigenous landscaping, low flow irrigation and the use of low energy lighting.

CLIENT:

Ga. Institute of Technology
Atlanta, Georgia

ROLE:

General Contracting
Recreation
Landscape

PERIOD:

2008

SIZE:

1.6 Acres

COST:

\$910,000
