

**PROJECT: OXBOW MEADOWS ENVIRONMENTAL PARK**

SITE PLAN

DESCRIPTION

**PROJECT DESCRIPTION**

The Columbus Water Works hired GDP to expand the recreational amenities and to improve the access to its 1,600 acre Oxbow Meadows Environmental Park on the Chattahoochee River. GDP constructed a 2,250 lf extension of a river walk pathway that required a series of bridge crossings. A new boat dock, fishing pier, and parking lot capable of handling boat trailers was added adjacent to a scenic lake. GDP installed a 34,900 sf grasspave parking lot along with a 9,800 sf concrete parking paver lot to accommodate additional visitors. A new decorative stone column and entry gate were also erected which give a new sense of welcome to this environmentally sensitive area.

**CLIENT:**

Columbus Water Works  
Columbus, GA

**ROLE / SCOPE:**

General Contractor  
Parking Lots  
Hardscape  
Landscape  
Pathways  
Bridges  
Boat Dock

**PERIOD:**
