

PROJECT: GEORGIA INSTITUTE OF TECHNOLOGY ECO-COMMONS

SITE PLAN

DESCRIPTION

PROJECT DESCRIPTION

The Georgia Institute of Technology awarded GDP with a design build contract to design and construct a 900 square foot, cantilevered concrete multi use space on the rear of the Materials Science and Engineering Building. The new public commons overlooks the President’s House and contains stainless steel outdoor seating, stainless steel cable railings, site lighting, and extensive landscaping. The project also included a portion of the campus connectivity plan by installing a paved pathway from the Tennis Center on Fowler Street through the Eco-Commons and out to the North Area Parking Deck on Atlantic Drive.

CLIENT:

Ga. Institute of Technology
Atlanta, Georgia

ROLE:

General Contractor
Design Build
Recreation
Stormwater Retention
Hardscape

PERIOD:

2008

SIZE:

900 sf
½ Acre Landscaping

COST:

\$346,279
